

Municipal Services from Peregrine

Years of experience working with cities and towns and deep knowledge of utility policies, programs, and resources for municipal energy projects has fine-tuned Peregrine's energy management services for municipal needs.

Working with large and small communities at any stage of energy planning and project development, Peregrine provides expert guidance, hands-on support, and powerful reporting tools that make it easy to initiate energy efficiency efforts, monitor progress toward goals, and save money.

Energy management planning:

- Identifying opportunities to reduce energy use and cost
- Developing strategic plans and setting measurable goals
- Facilitating multi-community collaborations
- Crafting RFPs and RFQs and supporting vendor selection
- Providing owner's agent services and ensuring vendor performance
- Recommending policies and standards for new building construction

Energy analysis and engineering:

- Benchmarking building performance
- Examining energy use patterns
- Inventorying and evaluating equipment for efficiency improvement
- Evaluating clean energy technologies
- Providing life cycle cost analyses for equipment and system replacements

Energy information management & reporting:

- Interactive dashboards and reports from **Peregrine Focus**, Peregrine's web-based energy information reporting tool
- Monitoring energy use, costs, and emissions over time
- Targeting problem buildings
- Tracking and measuring results from energy initiatives, including greenhouse gas reductions

Energy supply procurement:

- Preparing solicitations and securing competitive bids for natural gas, electricity, and liquid fuels

Municipal assets drive energy cost

- Ambulance stations
- City and town offices
- Community centers
- Fire houses
- Highway barns
- Ice rinks
- Libraries
- Parking lots
- Performance and convention centers
- Parks, playgrounds, and playing fields
- Police stations
- Public health facilities
- Public works garages
- Pumping stations
- Recycling centers
- Schools
- Senior centers
- Street lighting
- Swimming pools
- Wastewater facilities
- Water treatment plants
